

# HI-SCAN<sup>™</sup> 6046si

## HEIMANN X-RAY TECHNOLOGY

### **Feature Highlights**

- New X-ray generator with optimized spectrum
- New high resolution XADA sensor technology
- New HiTraX II system platform with extended scope of services
- High resolution image display with doubled resolution
- Up to 37 mm steel penetration
- . Wire detectability up to AWG 41

HI-SCAN 6046si is a consequent advancement of HI-SCAN 6040i, with more than 6000 installations worldwide the most successful X-ray inspection system in its class.

HI-SCAN 6046si, despite all similarities, is by far more than a conventional X-ray system with a facelift. Crucial technological innovations concerning X-ray sensor and image processing technologies were part of the R&D process.

HI-SCAN 6046si is equipped with an advanced multi-energy X-ray generator, a new generation of electronics plus a completely novel high resolution detector line.

Due to this optimized technology, the system demonstrates performance rates unachieved before.

HI-SCAN 6046si produces extremely detailed X-ray images, which impress by a more than doubled number of real, physical pixels. The drastically enhanced image resolution of the scanned objects represents a decisive advantage for image evaluations in security areas.

HI-SCAN 6046si additionally has a higher tunnel opening and therefore can scan objects, whose sizes exceed standard dimensions for hand luggage in the aviation industry.

HI-SCAN 6046si - increased security by advanced technology.
